1. During the period from 15 November to late December 1950 there was continual hauling of lumber into the woods in the Vollmau (N 50/U 79) and Prennet (N 50/U 79), area on the Bavarian-Czechoslovakian border. The sound of hammering and sawing was coming from the woods on the border.
2. It was observed on 6 December 1950 from the Bavarian side of the border that horse-drawn vehicles loaded with sections of prefabricated houses entered the woods about 3 km southeast of St. Katharina (N 50/U 88), and that empty vehicles left the area. The hauling was done in daylight without any efforts to camouflage the operations.
